OFFSHORE DIVISION

COMPANY OVERVIEW

Southey Contracting Offshore Division provides specialist access, inspection and maintenance services to the oil & gas and mineral sectors of West and East Africa.

The services provided include corrosion protection, UHP Water Jetting, abrasive blasting, tank cleaning, scaffolding, thermal non-destructive testing, material inspection services, lifting gear certification, maintenance and engineering solutions, unique access solutions and marine crew assignments.

OFFSHORE DIVISION

BUSINESS PHILOSOPHY

In line with our business philosophy of investing in our regions of operation, we have registered companies operating in Angola, Gabon, Ghana, Congo, Tanzania and Mozambique with further interests in regions where oil & gas and mining activities lend themselves to our Offshore Contracting Division.

We add value through our engineering capabilities to these select customers in the various business sectors in which we operate and are also able to train local employees offering our clients the local content requirements desired of them by government organisations.

OFFSHORE DIVISION

STRATEGIC OBJECTIVES

Vision

To operate as a dominant player providing specialised access, inspection and maintenance services to the international oil & gas and mining sectors.

Mission

To provide quality specialised access, inspection, maintenance and engineering services to our customers through our team of dedicated, motivated and trained personnel who understand that our customers are the reason for our business.

OFFSHORE DIVISION

HEALTH, SAFETY, ENVIRONMENT AND QUALITY

The health and safety interests of all employees are of paramount importance in the Southey Offshore, whilst the protection of the environment is a critical factor in all areas of the company's activities. We do not expose any of our employees to risks or dangers through the execution of their responsibilities and respect for the environment is a policy to which all employees adhere.

Southey Offshore has a Health, Safety and Environmental Management system authorised by senior management that clearly states the overall HSE objectives and a commitment to improving health and safety performance and minimising impacts on the environment.

Southey Offshore operates a quality management system accredited to ISO9001:2008 and continuous improvement of our processes is the driving force towards total customer satisfaction.

OFFSHORE DIVISION

FOOTPRINT

Our African footprint allows us to mobilise our multi-disciplined teams swiftly, so that we can respond to our client's requirements with effective access, inspection and maintenance solutions.

Our equipment is strategically placed in our operating areas and this enables Southey Offshore to provide a quick turn around on the major contracts that we secure throughout Africa.

The continued growth within the oil & gas and mining sectors will ensure ongoing investment in our offshore contracting operations.
